

Manas Singh

Full Stack Web Developer

9664225129 | manasinghofficial@gmail.com | Kota, Rajasthan

github.com/manasdotio | manassingh.dev

Professional Summary

B.Tech Computer Science & Engineering graduate focused on building full stack web applications with modern JavaScript technologies. Hands-on experience with React, Node.js, Express, MongoDB, REST APIs, authentication, and cloud services. Built and deployed practical products including a video-platform backend, a browser productivity extension, and a desktop-style React application. Strong focus on clean architecture, debugging, and turning product ideas into working web applications.

Technical Skills

Front-End: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js

Back-End: Node.js, Express.js, REST API Development, JWT Authentication, Socket.io

Database: MongoDB, Mongoose ODM, PostgreSQL

Tools & DevOps: Git, GitHub, Cloudinary, Multer, Postman, VS Code

Projects

VividStream – Video Streaming Platform Backend

2024 – 2025

Node.js, Express.js, MongoDB, Mongoose, JWT, Cloudinary, Multer

- Implemented JWT access/refresh-token authentication with HTTP-only cookies, organized using MVC architecture.
- Integrated Multer for temporary uploads and Cloudinary for cloud-based video and image storage.
- Built likes, comments, subscriptions, and watch-history features through RESTful APIs with MongoDB aggregation pipelines.
- Built a YouTube-like backend supporting user accounts, authentication, video uploads, thumbnails, channels, and media management.

KernelOS – Operating System Simulator

2025

React.js, JavaScript, HTML5, CSS3

- Designed the application as a single-page experience to practice component architecture and state management.
- Managed complex UI state for open/minimized windows, active processes, and desktop interactions using React.
- Built a browser-based desktop environment with a working file system, draggable windows, taskbar, and built-in applications.

Intentional YT – YouTube Focus Guard

2026

JavaScript, Firefox WebExtension APIs, browser.storage

- Persisted settings and usage statistics locally with browser.storage.local without sending user data to remote servers.
- Handled YouTube single-page-app navigation using route lifecycle events rather than relying on full-page reloads.
- Implemented Research Mode with topic tracking, Entertainment Mode with daily watch limits, Browsing Mode with timed sessions, and Night Lock.
- Built a Firefox extension that makes YouTube usage more deliberate by blocking distracting recommendation surfaces and separating Research from Entertainment viewing.

Education

Bachelor of Technology – Computer Science & Engineering

2022 – 2026

Modi Institute of Technology, Kota, Rajasthan | CGPA: 7.8 / 10.0
